This course is designed to inform you of state hiring requirements, hiring pool diversity and pre-employment aptitude/BAT testing considerations. This course further serves to inform of the legal requirement and importance of conducting law enforcement database (RADIUS) and prior employer research on potential candidates.

The course continues by covering pre-employment polygraphs and keeping unethical/illegal behavior out of the LE profession. Finally, the course covers APOSTC compliance and package submission on candidates, importance and legal requirements of psychological examinations, and an overview of the new RADIUS System/Database.
